Addendum for Road Department Pavement Distress Collection Services RFP 2016-01

- 1) Is the stated 450 miles, centerline miles or lane miles? **Centerline miles**
- 2) Do you have the functional class break down of the 450 miles? **Pavement**
- 3) Do you have any mapping or shape files of the 450 miles? **Yes, we can provide a shape file. However, it is not specific to the roads on the upcoming project.**
- 4) Is there any other specifications relevant to the collection. **No** It is stated: "Vendor shall use electronic equipment designed for recording pavement distress." Does this mean that a vendor could perform a windshield survey and photograph the pavement, would this satisfy the requirement? **Please see section 1.3 of packet. This shall be a video recording.** Or is the purpose to solicit a high speed automated collection vehicle?
- 5) Is there a distress manual that governs the classification of cracking and severity? **It is the intent of the Washington County to collect this information with the awarded bid. To date, a classification manual has not issued.**
- 6) Are there any other guidelines surrounding the existing signage surveying? **No. However signage must adhere to the any regulations enforced by the Arkansas State Highway and Transportation Department.** Any idea what signage currently exists, what exactly is the frequency of that signage, and what purpose and specification are needed for the resulting datasets? **No**

Thanks,

Alisha Willett
